- The SED Factory Group supervised the activities of the SED sections in the various departments of the police. Each section has a chairman and a personnel referent who, however, have to fulfill their regular duties in addition to party tasks. Within the sections, there are a number of so-called 10-man groups, the number of which varies with the size of the sections. The sections have to meet at least once weekly. Once every month there is a meeting of the whole factory group. The personnel referents are responsible to enforce the attendance at these meetings of all members. Records of attendance are kept, and non-appearance must be fully justified. The factory group keeps a master in ex on all SED members (today, in effect, all members of the Brandenburg nolice) which tell at a glance the extent and effectiveness of the individual's political activity. This is of great importance to the individual, since no promotions are possible without factory group endorsement which depends exclusively on "political reliability".
- Personnel Penartment (Abteilung "P"). In accordance with the East Zone practice, the personnel department of the Brandenburg police is not merely an office for personnel administration and allied matters, but is an office of considerable molitical importance and significance. Supplementing Section K-5 of the Criminal Police is the Personnel Tepartment's own active nolitical surveillance organization (Section P-5), charged primarily with security responsibilities for police personnel. The preferential nosition of the Personnel Tenartment within the police structure is also demonstrated by the fact that members of the frequent investigating, control, and examining commissions are invariably selected from among the members of the Personnel Department. Following is the organizational breakdown of the Personnel Department:
 - Legal questions, social welfare and support of P-1needy employees.
 - Structural organization, T/O questions, salary D-2 matters, monthly reports.
 - Procurement and dismissal of criminal nolice and P=3
 - administrative police.
 Procurement and dismissal of other police personnel.
 - Investigations and surveillance. P-5
 - 7-6 Schools and training.
 - Pisciplinary matters and complaints. P-7
 - Secretariat and registry. P-8
- In summer 1949 the Personnel Department re-surveyed all nolice personnel with a view of grouning them into one of the following categories:
 - Politically well indoctrinated, very active. Category 1 No minus points. Professionally competent. Recommended for immediate promotion.
 - Politically reliable, active. Professionally above average. Earmarked for later promotion. Category 2
 - Politically immature, active SED member. Category 3 Professionally average. Recommended for courses at notice and narty schools.

.. 4 ...

- Category 4 Politically reliable, but not active in SED work. Professionally below average. Not recommended for promotion, or schooling. Permitted to remain in subordinate positions.
- Category 5 Politically conscious, but not consistent. Shows oppositional tendencies. Active party member. Professionally average. Fecommended for transfer to less sensitive position (outside nolice).
- Politically not accertable. Includes SET members vetoed by STA. Must be dismissed Category 6 immediately.
- 10. In grouning an individual into one of the above categories, the following were considered plus points: working class origin, leftist political or trade union activity of parents, sisters, or brothers before 1933, between 1933 and 1945, KPD or SED membership after 1945; illegal activity under Hitler rérime: concentration camp experience; active in party work; above average professionally; nolice school and narty school graduations. In contrast, the following were considered minus points; bourgeois origin; membership in NSPAP; membership in SPD, CPU, or FDP since 1945: no party membership at all; non-active member of SED; higher than sergeant in German Army (unless re-trained in the USSR); P" in the "est; longer than seven months in Western P' captivity, particularly if relatives abroad or in Western Germany. Close relatives in Western Germany were considered of such significance that they outweighed all other considerations, and the noliceman in ruestion was invariably recommended for dismissal.
